

A healthier place to call home.

Free virtual visits from Curai Health* for adult Michigan residents without health insurance.

At Priority Health, we're working tirelessly to make health care more accessible for everybody and every body—physically, mentally and financially. It's why we're teaming up with Curai Health to offer free virtual visits for adults living in Michigan without health insurance through December 31, 2024.

Common reasons people seek virtual visits.

Urgent care

Preventative care

Wellness planning

Condition management

How does it work? Easy.

You can access Curai Health via the web or app—on your mobile device or computer. All visits are conducted through messaging on the Curai Health platform.

- Visit PriorityHealth.com/FreeVirtual or scan the QR Code and click the **Get Started** button

- Create an account.
- Explain in the chat what you need and how you're feeling. (The AI health assistant will give prompts.)
- A licensed clinician will review and continue the chat as well as provide a diagnosis and a course of action.
- If you're referred to services Curai cannot provide, they will help you find resources for discounted services.

*The virtual visits with Curai health are limited to text-based visits involving both use of Artificial Intelligence software and a provider. This offer is only available to uninsured residents of Michigan over the age of 18. Virtual visits do not include the cost of any prescribed prescriptions or recommended medical care outside Curai Health's virtual visit, providers or the cost of other services such as labs, specialist visits, surgeries or other medical care or incidentals. Priority Health assumes no responsibility and is not liable for the advice, accuracy, or medical care provided delivered by Curai Health.
